## Web Site Gets New Look

The Contra Costa County Library is celebrating the New Year with a new look for our Web site. We have made small improvements to our existing site by adding new features and refreshing content, making it easier to find what you need and to navigate our site.

### Enhancements include:

- New Community Library pages that are accessible via our new Community Library Locator. Each Community Library page contains a description about that library along with links to information about their programs and events.
- "Google-like" keyword searching into our online catalog, our Web site, or the Internet.
- Revised "Locations & Hours" page that is easier to read and provides access into community library programs and events.
- New Government Resources pages to help you contact representatives, obtain tax information, find election information, or find resources pertaining to local, state, or federal government.
- Compliancy with ADA (Americans with Disabilities Act) Standards for Accessible Design.

In our efforts to build a more streamlined and easily navigable site, we have added some new entries to the left-hand menu of our site:

- Moved access to "Research Center & eBooks" (formerly in the top menu).
- Created a separate entry point for "Live Homework Help".
- "Using the Library" offers information about Library services that was previously housed under "Programs & Services".
- Moved access to "Reserve a Computer" (formerly in the top menu).

The following pages have moved to the top menu: "Kids," "Teens," and "College Resources."

We hope that you find our new look an improvement. To take advantage of these new features, it may be necessary to refresh or reload your Web browser.
